# Headers / Footers

Remove Running Headers and Footers when it is identical or consistent on every page.

When editing a document converted from a PDF, headers and footers should have a regular pattern, allowing you to replace them with paragraph breaks. See [Find & Replace](#) for help on removing running headers.

Keep information that is unique to a page, such as footnotes. For example, on the below page keep the Footnote, but remove the Running Header.

[Example of a Page with a Header and Footnote](#)

If you have any questions, post your question on the [Production Q&A](#)
