## Character List

Plays sometimes have Character and/or Cast List.

These should be formatted as an unordered list. As well as any other list types within a play.

To learn more see the [Unordered List Section](#).

## Dialogue

In a play dialogue is often presented with the Character's name before the dialogue.

Sandy: I want to know how to format dialogue

Tom: It is actually easier to do that you would think!

Apply the Strong style to the Character name, and leave the dialogue in Normal style.

## Stage Directions

The stage directions are normally marked as "asides" or "sidebars".

Follow the guidelines for [sidebar](#) content.
